

INSEE Ecocycle is a subsidiary of Siam City Cement Group. Our chemical services team is highly specialized in cleaning and decontamination.

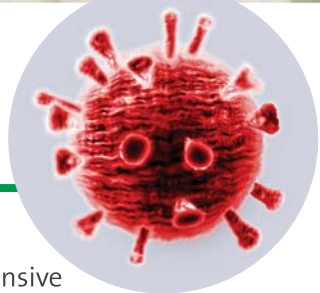

We operate with a high level of safety in our operations. We are now offering our expertise to provide safe preventive disinfection service for your “peace of mind”.

## Our Services:

- Disinfectant-spraying
- Usage of EPA-registered chemicals specifically for the disinfection of viruses including COVID-19
- Food grade chemical and environmentally friendly, not harmful to skin and the respiratory tract
- Chemical Dispersal Systems, creating very small droplets at 10-40 microns size range
- Fully encapsulated personal protective equipment (PPE) by our technicians

## Professional COVID-19 Disinfection Service

With highly skilled professionals and extensive experience of industrial cleaning, we are ready to provide an effective service which offers peace of mind for COVID-19 infection control and sanitizing.

Our service methodologies are based on OSH standards and The Ministry of Public Health guidance. We offer a disinfection service for all non-health care premises that wish to take precautionary and preventative measures.

## How Is It Done?

• **Step 1** : Evacuation of people and pets (if any) from the area of treatment.

• **Step 3** : Ecocycle’s highly trained service technicians will commence surface sanitization with through spraying of all areas such as table surfaces, door knobs, chair armrest, keyboards and phones with the disinfectant solution.

• **Step 2** : Before the space sanitization takes place, customers are advised to cover all electrical appliances and the ventilation systems will be shut off.

• **Step 4** : The enclosed treatment area will be exposed to the disinfectant solution for a minimum duration of one hour before the ventilation system can be turned on again.
